

FIL EDWARD F. BUITIZON

09214665987 · filedwardb@gmail.com · github.com/filedward1 · linkedin.com/in/fil-buitizon

Computer Science graduate (Cum Laude, GWA 1.5446) from the University of the East with a proven drive to learn, innovate, and compete — demonstrated through consistent participation in national hackathons, startup pitching competitions, and international research conferences. Led the thesis group behind NutriXtract, an AI-powered nutritional monitoring app published at IEEE AAIML 2026 and selected for global presentation at HCI International 2025 in Gothenburg, Sweden. Captained Team Gemma to Grand Champion victory at the Hackafest 2025 Codesprint. Also contributed as a team member to Scaffl.ed, which earned 3rd Place at the Philippine Startup Challenge X – NCR Region. Served as a student leader across multiple organizations, including the UE CCSS Student Council, UE Zenith Esports, and the Junior Philippine Computer Society – UE Manila Chapter. Proficient in Python, PHP, HTML, CSS, and TailwindCSS, with hands-on experience in Git & GitHub, Adobe creative tools, social media marketing, and multimedia content production.

EXPERIENCE

Information Marshal

Cosplay.ph Organization, Inc. — Contract

Oct 2023 – Present

- Background: Provided essential operational support for Cosplay.ph, the premier event organizer for cosplay and Japanese pop culture in the Philippines. Known for large-scale flagship events like Cosplay Mania, which attracts an average of 20,000 to 40,000 attendees annually at the SMX Convention Center.
- Experience: Coordinated front-line event logistics by managing attendee registration and wristband distribution while serving as a primary point of contact for real-time inquiries and lost-and-found operations.
- Impact: Ensured operational efficiency and protocol compliance by supervising assigned exhibition booths and providing essential logistical support as an event runner during high-traffic periods.

Solutions Intern

PASIA - Procurement and Supply Institute of Asia

Jun 2025 – August 2025

- Supported master data standardization initiatives to improve data consistency and accuracy.
- Assisted procurement operations, including supplier sourcing and eBidding processes.
- Conducted research on supply chain trends, logistics practices, and procurement strategies.
- Prepared presentations, reports, and documentation for internal and client-facing use.
- Contributed to process improvement efforts through analytical and administrative support.

Marketing Executive

Motormall NCR Inc. — Contract

May 2023 – Apr 2024

- Managed marketing efforts for Motormall NCR Inc., a key automotive dealer network in the Philippines specializing in commercial vehicles and logistics solutions. Entrusted with the digital presence of the Hino Pasig official branch, a primary hub for high-performance trucks and buses.
- Spearheaded end-to-end content production by designing and developing 50+ high-impact promotional materials (pubmats) for integrated digital and offline campaigns. Executed social media management for the Hino Pasig page, maintaining an audience of 4.9K followers and driving digital engagement to a peak organic reach of 38.5K during the campaign period.
- Elevated brand visibility and customer engagement through professional event photography and cross-platform content scheduling. Collaborated closely with internal business units to ensure all creative outputs and marketing initiatives aligned with core sales objectives and fleet growth.

Marketing Officer

Stallion Technopower International Inc. — Freelance

January 2022 – January 2024

- Designed and updated point-of-purchase (POP) marketing materials for product campaigns.
- Directed, shot, and edited promotional video content for digital marketing platforms.
- Developed creative assets to strengthen product positioning and brand communication.
- Coordinated content production workflows from concept development to final delivery.
- Supported social media marketing efforts through multimedia content creation.

PROJECTS

NutriXtract: Enhancing Nutritional Data Literacy Through an AI-Driven Pipeline for Object Detection and Label Interpretation

University of the East — Manila | Thesis Project

August 2024 – May 2025

- Led development of a React Native, FastAPI, and Supabase mobile app that uses OCR and YOLO-based object detection to interpret nutritional data, increasing user nutritional awareness from 31% to 92%.
- Engineered an explainable AI pipeline using large language models to convert raw data into personalized dietary insights, achieving an F1-score of 0.8612 and a 2.19% character error rate validated by medical professionals.
- Published and presented the technical paper at AAIML 2026 at Chuo University in Tokyo, Japan (IEEE SMCS) and earned selection for Global Presentation at HCI International 2025 in Gothenburg, Sweden.
- Qualified for AppCon 2024 as one of the Top 90 teams out of 178 applicants nationwide.

Auscura: AI-Powered Bioacoustic Poultry Health Monitoring

University of the East — Manila | Startup Project

April 2026

- Conceptualized Auscura — an IoT-based idea using low-cost microphones and AI to detect respiratory distress in poultry through sound analysis; developed a high-fidelity prototype in Figma.
- Selected as a Top 20 finalist out of 305+ applicants nationwide and advanced to national demo events to showcase potential impact on food security (SDG 2).
- Proposed a government-funded framework targeting the Department of Agriculture and LGUs to mitigate disease outbreaks in the ₱300B+ Philippine poultry industry through strategic public-sector partnerships.

Reeco: Community-Driven Mobile Platform for Urban Circular Economy

University of the East — Manila | Hackathon Project

March 2026

- Developed a mobile-first circular economy platform for swapping secondhand items with a built-in engine that quantifies waste diverted and CO2 saved.
- Architected a cloud-hosted framework and B2G revenue model for LGU analytics and a multi-city rollout across the Philippines.

HomeScape: A GenAI-Powered Fintech Gamification Ecosystem

December 2025

University of the East – Manila | Hackathon Entry

- Conceptualized HomeScape – a micro-gamified loyalty system for the Home Credit app that uses virtual home-building mechanics to incentivize financial microtasks and referrals.
- Built a high-fidelity prototype in Figma illustrating multi-phase progression, streak mechanics, and an AI mascot to reinforce financial literacy.

ClarfiAI: LLM-Powered Automated Quiz Generation System

May 2025

University of the East – Manila | Hackathon Entry (CCSS Code Sprint, May 2025)

- Built a mobile application that uses large language models to generate concept-based quizzes from uploaded PDF documents for active recall and subject mastery.
- Won Grand Champion at Hackafest 2025 and swept Best in UI, Best in Presentation, and Best in Prototype.

ACHIEVEMENTS

DisruptorX (Auscura)

April 2026

Top 20 National Finalist

- Developed an IoT-based system utilizing low-cost microphones and AI to detect respiratory distress in poultry via sound analysis, providing SMS alerts up to 48 hours before visible symptoms, as part of team Chekken.
- Advanced as a Top 10 College Finalist to the Top 20 nationwide in DisruptorX 2026 (305+ applicants); qualified for National Demo Day on May 25, 2026, addressing food security (SDG 2).

Blue Hacks 2026

March 2026

Computer Society of the Ateneo (CompSat), Ateneo de Manila University

- A 24-hour onsite hackathon by Ateneo de Manila University (CompSat) focused on UN SDGs 7, 11, and 12, challenging students to develop tech solutions for sustainable urban living.
- Developed Reeco, a circular economy platform as part of Team Chekken that tackles Metro Manila's daily waste via an item-swapping ecosystem with trust-scoring and impact tracking.

Enhancing Nutritional Data Literacy Through an AI-Driven Pipeline for Object Detection and Label Interpretation (NutriXtract)

January - March 2026

Presented and Published at AAIML 2026 IEEE Conference

- Published technical paper at AAIML 2026; indexed in IEEE Xplore.
- Presented at Chuo University, Tokyo, Japan.

The Philippine Startup Challenge X – NCR Regional Pitching Competition (Scaffl.ed)

November 2025

Regional Competition - 3rd Place

- Selected as a finalist in the 10th annual PSC, a flagship initiative by the DICT's ICT Industry Development Bureau. The competition challenges student innovators to develop tech-based startups that contribute to the Philippines' Trabahong Digital mission.
- Ranked 3rd Place (2nd Runner Up) among Metro Manila's top student teams at the Miriam College Henry Sy Innovation Center for the development of scaffl.ed, a tech-driven solution to socio-economic challenges.

Codesprint - UE MNL CCSS Hackafest (ClarfiAI)

May 2025

University Hackathon - Grand Champion

- An annual flagship HackFest at the UE Manila College of Computer Studies and Systems (CCSS), serving as a premier platform for students to engineer high-impact tech transformations and innovative code solutions.
- Led Team GEMMA to a Grand Championship victory, outperforming 3 other teams across various disciplines and year levels. In a decisive sweep, secured all major distinctions, including Best in UI, Best in Prototype, and Best in Presentation for the development of ClarifiAI

27th International Conference on Human-Computer Interaction (NutriXtract)

April 2025

International Conference Selection

- A prestigious global forum hosted at the Gothia Towers in Gothenburg, Sweden, held under the auspices of 21 international boards to showcase the forefront of Human-Computer Interaction.
- Earned conditional acceptance for a global presentation following a rigorous selection process. Recognized as a top-tier candidate by a nine-member international jury, positioned to compete for one of three major awards for the technical and design excellence of NutriXtract.

AppCon 2024 (NutriXtract)

April 2025

National Competition - Top 90 Qualifier

- Competed in the Philippines' premier web and mobile app competition supported by OTis Inc. (Japan), ITCareer.ph, and PSITE. The initiative challenges developers to engineer high-impact digital solutions that address critical social issues within the Philippines.
- Emerged as a Top 90 National Qualifier from a highly competitive field of 178 teams nationwide. Recognized for the technical innovation of NutriXtract, an AI-driven application developed under Team GEMMA to enhance nutritional literacy and public health.

Hackada: KadaKareer x Home Credit – AI in UX for Fintech Hackathon

December 2025

KadaKareer x Home Credit Philippines

- A high-stakes fintech competition organized by KadaKareer and Home Credit Philippines. Challenged students to leverage Generative AI to enhance User Experience (UX) and drive financial inclusion within the consumer finance landscape.
- Designed HomeScape, a GenAI gamified loyalty ecosystem for the Home Credit app. Engineered a virtual home-building game with AI coaching to boost user retention, supported by a 98.7% correlation between gamification and buying intent.

EDUCATION

Bachelor of Science in Computer Science

University of the East

- Graduated Cum Laude with a General Weighted Average (GWA) of 1.5446
- Awarded the Exemplary Academic Performance Award
- Passed the Programming Skills Evaluation

June 2026

July 2025

November 2025

TECHNICAL SKILLS

Technologies:

Python · HTML & CSS · JavaScript · C++ · Java · SQL · R · Supabase · React Native · PHP · Git & Github · TailwindCSS · Vite

Design & Tools:

Adobe Photoshop · Adobe Premiere Pro · Photography · Microsoft Excel · Presentations

CERTIFICATIONS

IT Specialist Certification – Python Certiport	October 2024
Web Development for Beginners – HTML, CSS, and JavaScript Certificate Ground Gurus	January 2024
Basic Java Programming – Java Core and Object-Oriented Programming Certificate Ground Gurus	April 2024

LEADERSHIP & AFFILIATIONS

4th Year Representative Junior Philippine Computer Society (JPCS) – UE Manila	2025 – 2026
Serving as the primary liaison for the senior cohort, coordinating organizational events and technical workshops to bridge academic learning with industry-standard tech trends for student innovators.	
CCSS Representative University of the East Zenith Esports	2025 – 2026
Acts as the strategic link between the College of Computer Studies and Systems and the university's esports organization, assisting in the coordination and management of tournaments and gaming events both university-wide and within the department.	
3rd Year Representative UE CCSS Student Council	2024 – 2025
Represented the junior batch within the college executive board, advocating for student welfare and collaborating on college-wide programs to enhance the academic and social experience of the student body.
